

Community Alliance with Family Farmers and the Viticulture Association of the Santa Cruz Mountains are pleased to present

Vineyard Water Management II: Irrigation Strategies and Sap Flow Sensors

Friday, April 18th,
9am- Noon
Registration at 8:30 with coffee

Ridge Vineyards,
Monte Bello Production Facility
18100 Montebello Road,
Cupertino

Join us for a morning discussion on irrigation strategies for vine health and sound water management to produce quality wine grapes and promote sustainable water use.

Speakers include:

- **David Gates**, Vice President of Vineyard Operations, Ridge Vineyards *on vineyard irrigation management at Monte Bello and methods to decrease water use.*
- **Larry Bettiga**, UCCE Viticulture Farm Advisor, *on vine water use including: vine physiology, the effects of water availability on vine health, and measurement methods for evapotranspiration.*
- **Thibaut Scholasch PhD**, Founder, Fruition Sciences, *on vine response to water stress and the science behind using sap flow sensors to schedule irrigation events.*
- Workshop will include a vineyard tour and sap flow sensor demonstration.

Please join us for lunch and wine after the workshop!
RSVP to Kendall Lambert at kendall@caff.org or 510.832.4625 x 13 by April 15th
Space limited to 50 guests
